

SEP 05 2001

25 MR. HASLEY: My name is Statler,

0057

550657

1 S-T-A-T-L-E-R, Hasley, H-A-S-L-E-Y.

2 I'm a student of environmental studies. I

3 have spent several years researching and reading about

4 Yucca Mountain within my major and I feel at this time

5 that it is not the appropriate time with the research

6 that has been done to put nuclear waste at Yucca

7 Mountain on the conditions of transportation. Of the

8 studies that I've seen even to other types of

9 facilities have not been adequate and, as such, the

10 economics and other types of reasons, that there just

11 hasn't been enough research to prove that waste

12 transportation is safe and at this time and even

13 economically. Also, I feel that the studies that do

14 hold that much nuclear waste within the area may not be

15 researched enough and the studies aren't sufficient at

16 this time. So I don't approve that there should be

17 nuclear waste at Yucca Mountain. That's pretty much

18 it.
